

secMAC⁺

VIDEO-
LARYNGOSCOPE

secma
medical innovation

WE PROUDLY INTRODUCE THE secMAC⁺ VIDEO LARYNGOSCOPE

- IT HAS REVOLUTIONIZED THE FIELD OF
VIDEO LARYNGOSCOPY.

Adult
& Pediatric
scopes

The secMAC⁺ boasts large horizontal and fully adjustable high resolution screen that can be tilted forth in any given position until folded completely down. The screen can also be rotated both ways to cover all intubation and viewing angels.

The interchangeable and rechargeable batteries offers up to 4 hours of active battery time and has a battery time indicator visible on-screen. The secMAC⁺ is built around a very sturdy metal frame, making it extremely durable and the intelligent blue light source ensures very clear and realistic image during the procedure with no image delay.

The secMAC⁺ also provides the opportunity for recording photos and video clips for both documentation and educational purposes. The secMAC⁺ can of course also be used for direct laryngoscopy, should the need arise.

The secMAC⁺ provides easy, quick and safe intubation in both clinical and trauma situations with a wide selection of sterile disposable blades to cover every possible intubation scenario. It will easily fit the every day use in anesthesia departments, ambulances and ICU doctors.

Always ready - always at hand.

- Digital and fully adjustable screen
- Very suitable for educational use
- Photo & video recording
- Up to 4 hour active battery time
- Rechargeable batteries
- Tempered glass

Intelligent
blue lighting
for optimal
visibility

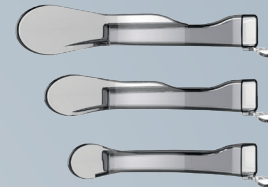

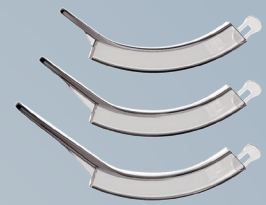

THE DISPOSABLE BLADES :

- Very robust design
- Anti-fog treated
- Sterile

Wide selection of blades and sizes

Highly transparent for optimum visibility

D-Blade for difficult and extreme airways

For direct/ indirect intubation

Angled

Hyper angled

secMAC⁺ ONE TOUCH - ONE BUTTON

Easy to clean- with standard IPX7 for handle and IPX4 for screen

Tempered glass - option for anti reflective glass

Slimmer camera stick has enabled the design of slimmer blades - creating better manoeuvring capabilities of the scopes in the airway and a better visibility of the process

The scopes comes with 2 rechargeable batteries and battery charger, to make sure secMAC⁺ is always ready with just one touch at the one button

WIDE SELECTION OF STERILE DISPOSABLE BLADES

With secMAC+ video laryngoscope comes a wide selection of sterile disposable blades to cover everything from the routine intubation to management of the extreme airways. Disposable blades for intubating a large adult to the neonate infant.

Adult scope

Blade item no.	Colour code	Clinical application	
Mac-2M		Child & adult Macintosh style	 Direct /indirect intubation
Mac-3M		Adult - Macintosh style	
Mac-4M		Adult - Macintosh style	
Mac-2		Child & adult	 Angled
Mac-3		Adult	
Mac-4		Adult	
Mac-3D		Adult - Difficult airway	 Hyper angled

Pediatric scope

Blade item no.	Colour code	Clinical application	
Mac-1		Child	 Angled
Mac-0		Infant & child	
Mac-00		Neonatal & infant
